OUR MISSION

Netsol is committed to delivering quality Technology Solutions and Professional Services that provide true business value to our clients, enabling them to achieve their desired goals and initiatives. To use our expertise to the benefit of our customers, become their trusted partner and successfully complete their IT projects with the highest standards of implementation, integration and support services.

OUR VISION

Our vision is to become the leading and most trusted system integrator in the region. This means getting close to customers, understanding their businesses, and establishing long-term relationships with them and to provide services solutions that will create a sustainable competitive advantage for our customers.

VALUES

- Innovation
- Reliability
- Integration

OUR COMPANY

Netsol Company is a Kuwait based well-known general trading company and **Netsol** is the contracting division under Techsol Company.

Netsol is an IT/Telecom Engineering company dedicated to provide the finest engineering and IT Consulting services at competitive rates. Our members and staff of engineers are highly experienced and dedicated professionals with proven years of experience in IT/Telecom and Low Voltage industry.

Our capabilities in managing resources and skills have made us a potent force in system integration and information solutions offerings. Our company is a trusted integrator to the Telecommunications, Utility, Government, Oil and Petrochemical sectors with the regional and domain experience to deliver technically innovative and complex projects.

Our strengths do not begin and end with good management. Throughout the years, we have acquired healthy measures of solidarity and goodwill among every employee working within the organization. Ideas, concepts and strategies are conceived, encouraged, formulated, and developed together. Hence, whenever our IT team undertakes a project, the collective intelligence, innovation and drive are the foundations that form our cutting-edge solution package.

Our 'IT/Telecom' division specializes in Wireless and Wired Network Design, Fibre Backbone and Fibre-To-The-Premises (FTTP) data systems, Voice and data converged networks, Telecommunication Infrastructure, Optimization, Switching and Trouble shooting.

Our 'Low Voltage' division is specialised in SMART building solutions such as IP CCTV Security, Access Control, Public Address, Building Automation, Audio Video systems, Car Park management system, perimeter security, Queue Management systems, etc.

- Over a decades experience in System Integration
- Total low voltage system solutions provider
- Professional team with excellent knowledge base

PARTNERSHIP

Using extensive international experience, we have developed partnerships with the best-of-breed technology vendors and invested time and resources in new technology evaluation to select proven, high performance system components. This allows us to deliver truly excellent solutions from commercial off-the-shelf (COST) components with unprecedented price/performance.

SALES AND BUSINESS DEVELOPMENT DEPARTMENTS

Our sales and business development department ensures our customers are being served and serviced with the most sincere and professional manner.

Its main responsibility is to affirm requirements with available solutions and emphasize how beneficial the outcome will be to our customers.

This department will plan and provide the best approach to ensure our clients and prospective clients receive the most cost effective solutions.

Constant evaluation on supplier, principals and products as well as assuring high level of quality services and products are among other duties of this department.

TECHNICAL SERVICES

Netsol has invested a lot in developing our engineering and support system. A wide range of resources and expertise have been made available to ensure all issues and technical problems can be attended and solved within the shortest time possible.

Our extensive experience in the deployment of large-scale projects and multivendor system integration

guarantee a risk free delivery and highest quality maintenance and support. The project execution phase involves implementing plans created during the project-planning phase. While each plan is being executed, a series of management processes are undertaken to monitor and control the deliverables produced against acceptance criteria. Once all of the deliverables have been produced and our customer has accepted the final solution, the project is ready for closure.

Spares parts and stocks are maintained regularly to ensure that parts can be used immediately whenever required.

TECHNOLOGY POINTING IN THE RIGHT DIRECTION

FINANCE & ADMINISTRATION

The Finance and Administration Department provides support required for maintaining customers' satisfaction. Representatives from these departments ensure that the procedures are strictly adhered to the point of ordering to product/system delivery.

Our HR department is dedicated to provide a better working environment to our employees and develop their skills through continuous training programs.

AFTER-SALES SUPPORT & SERVICES

A solution is never complete without after sales support. It is crucial to provide enough support for ensuring the solution provided is always at its peak operational condition. Our experienced and well-trained personnel will always strive to give their best services. With a good relationship with our principles and partners, our customers can be assured that problems will be rectified and systems will be maintained to the highest level.

COMMUNICATION INFRASTRUCTURE SYSTEMS

Our company is strategically focused and is investing heavily on continuous evolution of its communication infrastructure product-line. Netsol is incorporated with the latest standards and state-of-art technologies, in order to deliver cost effective communication infrastructure solutions, that address the rapidly growing market of communication services.

OUR INFRASTRUCTURE PORTFOLIO INCLUDES:

- Network Topology and Architecture Design
- Data, Voice & Video Networking
- LAN, MAN & WAN Networking
- Wireless Networking
- IP & Analogue EPBX Systems
- VoIP & IP Telephony
- Industrial Installation of Copper & Fibre Cables
- Data Centre Networking
- Structured Cabling Systems
- Total Fibre Optic Solutions
- Cable Management Systems

SECURITY & LOW VOLTAGE SYSTEMS

We are always at the leading edge of all Security Management Technologies to bring you the latest technology straight into your building. Our Security & Low Voltage system products assist you in meeting challenges both today and in the future, and will help you answer some of your toughest security problems. We have carefully selected prominent brand names to ensure only high quality products are being sold to our customers. More importantly, these products come with sufficient and reliable support from their committed principals.

THE SYSTEM PORTFOLIO INCLUDES:

- CCTV Surveillance, IP & Analogue
- Access Control
- Biometrics Security System
- Intruder Alarm Systems
- Audio Video Systems
- IPTV & SMATV
- Digital Signage Systems
- Bollards & Road Blockers
- Scanning & Detection Systems
- Visitor Management Systems
- Car Park Management & Gate Barrier Systems
- UVSS & LPRS Systems
- Video Analytics
- LED Display & Sports Score Boards
- Queue Management Systems
- Time & Attendance Systems
- Vault Door & Electronic Door Lock Systems
- Building Automation Systems

BRIDGE THE GAP
WITH NETSOL AS A
SOLUTION PROVIDER....

SMART BUILDING SOLUTIONS

Netsol set its intelligent Building Services strategy on long term business objectives and built its capabilities and partnerships, to facilitate the implementation of the facilities owners' vision.

A Smart Building is a term widely used today to refer to the use of technology in providing:

- Communications (Telephony, Internet access & Video)
- Security (CCTV Surveillance & Access Control)
- Energy Saving and Resource Control (Electricity, Lighting, Lifts, Heating, Ventilating, Air Conditioning, Water, Gas & Oil)
- Car-Park Management and Utilization
- 24/7 Monitoring, Operating & Facility Management
- Billing Facilities to Modern or Modernized facilities

Regardless of the diversity, building owners are motivated to implement such services in various degrees because of the following advantages:

- They provide tenants with modern and secure communications and information capabilities along with other comfortable lifestyle services that allow owners to charge higher rental rates and get better return on their investment.
- Provide facility owners with efficient and cost effective tools to operate the facility, reducing the on-going operating costs and raising their profitability rates.
- Allow facility owners to meet the ever evolving strict environmental regulations imposed by environmental, municipal and governmental organizations on a worldwide basis.
- A direct result of the above is higher on-going revenue facility that benefits the financial results.
